Step_E

Light that designs shapes and reflections, together with profiles that enhance the unique, innovative design. The radiator's built-in ergonomic push & round control unit guarantees the adjustment of every heating function, from switch-on to switch-off, from the setting of the temperature to the other operational parameters with just one single, user-friendly gesture. The lower flattened pipe contains the electronic control unit for the electric heater that is perfectly integrated and certified for operation in high humidity areas at the highest levels of reliability and safety.

Step E, Hight 1255 mm, Lenght 500 mm, Electric, Pearl Grey

Construction features

flattened pipes in aluminium, 40 mm height
long electricity cable: 1.200 mm (lower right side cable outlet), schuko plug

Standard equipment

wall fixing systems the same finish as the radiator

Certifications

CE

Plus

reddot award 2014 winner

Standard equipment

- wall fixing systems the same finish as the radiator

Packing

The attention that Irsap lavishes on each radiator is also evident in the care given to packaging. Every radiator is protected with packaging caps in shock-resistant material; this extra protection prevents damage and scratching during both shipping and handling onsite. In regard to STEP products, reinforcement has been inserted all around the packaging's perimeter to ensure adequate protection during transport. All the packaging must be disposed in conformity with the regulations in force, acknowledged by the respective bodies.
