Tratto

A three-dimensional line that evolves, moving away from the wall to enter the surroundings with the additional function of support; two blades of light at its sides emphasize the etherealness of the skyline formed by fluid surfaces and curves that create support surfaces, an elegant functionality concealed by new forms. The valves are hidden and lead to just one element attached to the wall.

Tratto, Hight 1600 mm, Lenght 450 mm, Quartz 1

Construction features

radiating panel
1/2" Gas right threading
maximum working pressure 4 bar
maximum working temperature 95°C
this radiator is already fitted for the insertion of the optional
thermostat
head

Standard equipment

water connection system installed on the product complete with fittings for connection to copper pipes (12, 14 and 15 mm diameter) and multilayer pipes (14 \times 2 thick and 16 \times 2 thick)

wall fixing system
accessory towel holder
LED lighting system optional
air vent

Thanks to the high performance of Irsap Tratto radiators, the ideal Δt for low temperature projects is Δt at 30°C.

For Δt different from 50°C use the formula Q=Qn (Δt / 50)n

Standard equipment

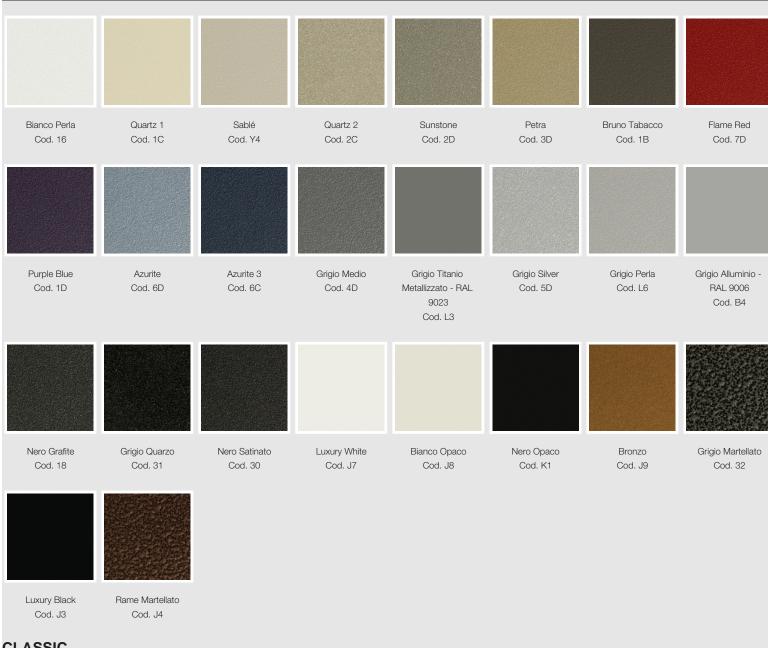

water connection system installed on the product complete with fittings for connection to copper pipes (12, 14 and 15 mm diameter) and multilayer pipes (14 x 2 thick and 16 x 2 thick) • wall fixing system • accessory towel holder • LED lighting system optional • air vent

Packing

The attention that Irsap lavishes on each radiator is also evident in the care given to packaging. Every radiator is protected with packaging caps in shockresistant material; this extra protection prevents damage and scratching during both shipping and handling onsite. All the packaging must be disposed in conformity with the regulations in force, acknowledged by the respective bodies.
