RAL 9005-M Jet black (matt)

RAL 9005 BRILLIANT (on request only for same model)

SPECIAL FINISHES +35%

- BR 0031 only for panels, Cross, Essen, Quar and Pit, is a brushed-metal effect to hide scratches on the surface, clear varnish. (BR 0007 is the color that both comes closest to natural iron and best conceals imperfections).
- BR 0021 transparent polished finish, it transmits the brass effect, glimpsing weldings.
- SB 0022 BL polished and nuanced rust color finish that perfectly fits with the gilded leaf finishes (Eruzione)

BR 0031 Transparent brushed metal

BR 0021 Simil-brass clear

BR 0022 BL Bright rust (shaded color)

BREM SPECIAL FINISHES (panels excluded)

- BR 0001, a transparent metallic bright finish, highlights the signs of working on iron (welding, scoring, brushing, rings, marks, etc.); the phosphate greasing process enhances the colors of steel in shades of grey, blue, brown, and dark green, and makes each piece unlike any other. This finish is a good example of "Poor Art" and it is not available for the radiating plates.
- BR 0001 MS, a clear matte finish, transmits all the raw material's "brutality", whereas a shiny finish softens the look (not available for radiating plates).
