Product codes can be found in product data sheet tables. The codes provide some basic information about the product while a partially filled configuration code contains complementary information about the detailed specifications. When placing an order, product codes should include the fully completed configuration part. The configuration code part should be placed after the main product code. The main product code and configuration part will appear as shown in the example below:

## The construction of a water and dual fuel radiator product and configuration code:

WGW51094040

PRODUCT CODE  
(located in the table for the product)

K916SX

CONFIGURATION CODE  
(supplemented by hand)

### Example Configuration

**K 916 SX**

Package code  
*K - carton box*

Connection code

## Construction of electric heater configuration code:

WLW51094040

PRODUCT CODE  
(located in the table for the product)

K916E1DRYW

CONFIGURATION CODE  
(supplemented by hand)

### Example Configuration

**K 916 E1 DRY W**

Package code  
*K - carton box*

Colour code

Connection code

Heating element code

Type of heating element cable code

## Epoxy primer

**E** – Code of epoxy primer is an extra processes.

WGW51094040 K916SX **E** — Extra processes or additions code

## Legend

Radiator available in a "water" version.

Radiator suitable for dual fuel connection. Electric heating element can be installed.

Radiator available in electric only version. It comes prefilled with a 'heating medium' and equipped with a heating element. All tested and ready to use.

Connection types dedicated for this radiator. The icon shows the flow and return connections for the radiator as well as the thermostatic valve and heating element position if applicable.

Suggested heating element power output for electric and dual fuel versions.

Weight.

Capacity.

Available in chrome finish.
