

RELAX POWER

RELAX
RADIATORS

RELAX POWER
height 1963 mm, length 653 mm. Agave finish (cod. 9N).

Technical features:

- radiating panel
- thread pitch of 50 mm, M24 x 19
- maximum working pressure 10 bar
- maximum working temperature 95°C
- This radiator is already fitted for the insertion of the optional thermostat head

Price included:

- water connection system complete with fittings for connection to copper pipes (12, 14 and 15 mm diameter) and multilayer pipes (14 x 2 thick and 16 x 2 thick)
- wall fixing system
- air vent
- installation template

Hidden hydraulic connection INCLUDED IN THE PRICE

RELAX POWER features the innovative hidden hydraulic connection system. This type of connection hides all valves from view to the advantage of the heating element's formal aspect. Another winning feature of this type of hydraulic connection is its easy installation.

A valve and lockshield valve system connected to flexible hoses permits elevated installation flexibility and the varying of the connection centers from a minimum 45 to a maximum 100 mm as desired.

We recommend installation with water inlet from the right and water outlet from the left.

The hidden hydraulic connection with universal connection M30 x 1,5 is designed for the installation of a thermostatic valve (optional) or for the innovative "NOW" temperature adjustment system.

We advise installing the radiator at least 150 ÷ 200 mm above the floor.

(*) Thanks to the high performance of Irsap RELAX POWER radiators, the ideal Δt for low temperature projects is Δt at 30°C.

For Δt different from 50°C use the formula: $Q = Q_n (\Delta t / 50)^n$

Accessories towel-holder

The towel-holder is a design accessory that can be positioned at the desired height even after the radiator has already been installed. This means Relax can also be used as a towel warmer.

Available in 2 versions, Small (Fig. 1) and Large (Fig. 2) both with a polished chrome-plated finish.
